

GMP POLICY

„Running our business in compliance with applicable law regulations, we are oriented towards continuous improvement of the System of Good Manufacturing Practice (GMP)“

PCC Exol SA, respecting the System of Good Manufacturing Practice adapted to Cosmetic Ingredients, in compliance with the standards of the European Federation for Cosmetic Ingredients (EFfCI), has agreed to continuously improve good manufacturing practice in accordance with respective law regulations and other legislation applying to this area of business.

It is an element of our strategy to keep and continuously improve the System of Good Manufacturing Practice for Cosmetic Ingredients in line with the implemented Integrated Management System.

We declare to keep on improving effects of our work and to take further improvement actions in the following areas:

- assuring quality of cosmetic ingredients at each and every stage of their manufacturing, controlling, storing, distributing and selling
- aiming at meeting the highest quality standards acting according to European Federation for Cosmetic Ingredients (EFfCI)
- aiming at broadening our product range, extending our technological base and at improving qualifications of our staff
- reducing risks to the environment

The Management Board of **PCC Exol SA** assures that the GMP Policy has been understood, communicated and executed at every level of the organization that the System of Good Manufacturing Practice for Cosmetic Ingredients (GMP) applies to.
